

Flowshield Quartz to Printers 2009

NIFL Resin Flooring successfully carried out an installation of Flowshield Quartz to the Recreational Area of a Successful Hull Based Printers...

NIFL Resin Flooring successfully installed 126m² of Flowshield Quartz, manufactured by Flowcrete, to a Factory Recreational Area, Hull.

NIFL chose Flowshield Quartz for its smooth, glossy, self smoothing resin floor finish with a decorative speckled finish. It is ideal for a minimalist, modern, contemporary environment. Flowshield Quartz is ideal for areas with intensive traffic such as shops, department stores, restaurants, garden centres, garages and airports. Flowshield Quartz has an attractive and colourful floor finish. It is easy to clean and maintain, it is hard wearing and has a high chemical resistance.

The installation was carried out over the Christmas shut down period and has received very positive feedback regarding the affect it has had on the overall area.

NIFL installs Industrial, Commercial and Residential Flooring Systems throughout the UK.
