## NIFL Installs Resin Bonded Natural Aggregate...

**NIFL successfully installed 2,500m<sup>2</sup> of Autumn Gold Aggregate Bonded using Addagrip Self Levelling Epoxy Resin, Addastone, manufactured by Addagrip to Highfields Science Park, Nottingham.**

The substrate had to be levelled in areas using a high strength mortar followed by the application of a polymer grout used to give increased strength and uniformity.

The Addastone Epoxy Self Levelling Screed was applied using a squeegee and then fully broadcasted with washed and double dried blended aggregates.

The system was installed to compliment the aesthetic appearance of the surrounding buildings, to protect the Tamacadam substrate from vehicular traffic in areas and to provide a slip resistant surface for pedestrians along graded walkways.

NIFL has its Head Office in Hull and a Branch Office in Nottingham. Contracts are undertaken nationwide.

**Manufacturer:** Addagrip

**Products:** Addastone Epoxy Self Leveller Resin & Long Rake Spar Natural Aggregates

**Completion Time:** 20 Days
