

Lexus Training Centre 2008

560m² of Peran SL, Lexus Training Centre

NIFL installs Peran SL to Lexus Training Centre

NIFL has successfully installed numerous varieties of Commercial Resin Flooring Systems in 2008 including FeRFA Types 3-7.

Lexus Training Centre

A high gloss self levelling epoxy resin, Peran SL (FeRFA Type 5), was chosen by NIFL in order to provide a minimalistic floor finish which would highlight the appearance of the vehicles. As shown by the shadows on the photographs a mirror image flatness was achieved by NIFL, within BS Tolerance SR1.

Peran SL is ideal for use in high traffic areas such as shops, department stores, restaurants, garden centres and airports.

NIFL Resin Flooring

Epoxy, Polyurethane and MMA Resin Flooring
Resin Bound and Resin Bonded Surfacing

The installation had to be completed over a weekend in order to avoid other building trades. And as it was essential the floor was not contaminated, NIFL Resin Flooring managed to complete the entire area in just two days.

In order to provide a more scratch proof surface, NIFL Resin Flooring applied Enhance Polish by Evans Vanodine.

NIFL installs Industrial, Commercial and Residential Flooring Systems throughout the UK.

Manufacturer: Flowcrete

Products: 560 m2 of Peran SL
