

# Lexus and Toyota Workshop 2008

## NIFL Installs Flowcoat SF41 to Toyota and Lexus...

**NIFL successfully installed 1,250m<sup>2</sup> of Flowcoat SF41, manufactured by Flowcrete, to several Lexus and Toyota Workshops in Nottingham.**

NIFL Resin Flooring used SSP (Specialist Surface Preparation) in Scunthorpe to Shot Blast the existing concrete using dust free captive blasting, and heavy duty diamond grinding, where the substrate was uneven. SSP used small hand held grinders to prepare the edges and around machine bases.

Once the floor had been sufficiently prepared, NIFL applied the two coats of Flowcoat SF41 over a weekend period in order to help the builder achieve their programme.

**FerFA Contractor of the Year 2006/2007**  
**Nominated Specialists Awards 2009**

Flowcoat SF41 may be used as a hard wearing coloured floor coating in areas such as factories, warehouses, plant and storerooms where high resistance against chemical attack is required.

NIFL Resin Flooring installed this system as part of a series of ongoing projects at University Boulevard for Morgan Ashurst.

NIFL Resin Flooring is Resin Flooring Contractor specialising in Commercial and Industrial Systems nationwide. NIFL works through two regional offices in Yorkshire and Nottinghamshire.

**Manufacturer:** Flowcrete

**Products:** Flowcoat SF41

**Completion Time:** 2 Days
