Commercial Resin Systems 2008

Toyota and Lexus Academy, BMW Dealership and Designer Offices

Above:

NIFL Resin Flooring Altro Pebblestone, manufactured by Altro Resins, to 35 Stair Treads including bar fixings to the new GKL Northern Office Building in Peterborough.

NIFL Resin Flooring Installs a wide variety of Commercial Resin Flooring Systems

NIFL Resin Flooring has seen a dramatic rise in the number of commercial installations of resin systems being undertaken in the UK. Above are three examples of the systems available to architects and specifiers to provide a unique aesthetic appearance to any environment.

The first installation above is of a self levelling epoxy resin manufactured by Flowcrete. The system was used to a car show room area. The second installation is also to a show room, and shows the diversity of resin systems on offer. This installation is a stone carpet to a BMW Motorcycle Dealership in York. Resin based Stone Carpet systems are probably the most popular system specified in car dealerships.

The third installation demonstrates the versatility of resin systems. The Altro Pebblestone incorporates steel bars on the treads to provide added non-slip and a simplistic appeal.
