

# Leeming Bar Food Enterprise Centre 2009

**NIFL Resin Flooring successfully installed 1,500m<sup>2</sup> of Altropol Polymer Modified Granolithic Screed and Altrocrete PU HF Heavy Duty Polyurethane Screed to the Leeming Bar Food Enterprise Centre.**

The Food Enterprise Centre will comprise seven food grade starter units and four grow-on units, plus a central management support suite, meeting/training room facilities and a fully fitted food grade test kitchen for hire by tenants and third parties. One of the main challenges of the project was the need to ensure that the units provide a good basic food grade shell which can be easily adapted to suit as many different food activities and processes as possible.

The Principal Contractor William Birch and Hambleton Council chose NIFL Resin Flooring to install Altro's food safe heavy duty flooring system over 1,500m<sup>2</sup> including 900m of perimeter coving and 200m of flexible expansion joints.

The project was completed to a high standard and led to NIFL and Altro securing a further 3,000m<sup>2</sup> contract within close proximity for the new Caw Ingredients Production Facility.

**FeRFA Contractor of the Year 2006/2007**

**Nominated Specialists Awards 2009**
