

Mercedes Centre 2007

Worked Hard All my Lifetime...

NIFL Working Hard

Mercedes is a brand synonymous with fantastic design and reliable quality. So when it came to refurbishing a new Mercedes centre, NIFL was chosen to help create a new look with a wow factor.

Nottingham Industrial Flooring applied 2,000m2 of High Build Floor coating, incorporating a Slip Resistant Scatter to walkways and Diagonal Hatching and as part of the refurbishment.

A High Build Floor Coating from Nottingham Industrial Flooring is classified as a FeRFA Type 3 Floor, and provides a smooth gloss finish in a range of colours including clear.

Furthermore, the floor is as practical as it is eye catching. It has excellent abrasion and chemical resistance characteristics, and provides a heavy duty coating for floors which will withstand many years of traffic. Even on rough concrete, a smooth and easily cleanable surface can be achieved.

'It was a tough work schedule to get the job done over Christmas, but NIFL were certainly up to the job.'
