

Nestle Extension 2008

NIFL Resin Flooring successfully carried out an installation of 1,000m² of Altrocrete PU HF to a new Nestle Extension 2008...

NIFL successfully installed Altrocrete PU HF, manufactured by Altro Resins to a specially developed Nestle colour, along with perimeter Kerbs and Coving, Expansion Joints, High Build Epoxy Floor Coatings and Stair Tread and Riser Protection.

Altrocrete PU HF installed at 5mm is a FeRFA Type 6 Heavy Duty Polyurethane Screed. It has a life expectancy of 10 years and can be warranted up to as much. Altrocrete PU HF is the ideal long term flooring solution for any manufacturing facility, especially within the food industry as Altrocrete PU HF is classified as 'Non Taint' and 'Non Toxic'.

The installation at Nestle took place on 10 separate levels and working areas, so NIFL had to develop a close working relationship with the builder throughout the project. The Quantity Surveyor of Caddick Construction commented on completion, **'The finish was to an extremely high standard with NIFL carrying out their own thorough snagging inspection prior to offering their works as complete to ourselves. We were extremely pleased with the manner in which NIFL completed their subcontract works and we would have no hesitation in using them once again.'**

**FeRFA Contractor of the Year 2006/2007
Nominated Specialists Awards 2009**

Manufacturer: Altro

Products: Altrocrete PU HF

Completion Time: 4 Months
